

The Squared Circle

What's the law of equivalent exchange?

1. All vertices are associated with a symbol, and the clues below will help you identify which symbol is which
2. The primes share a commonality with the celestials. This is not a coincidence
3. The Hermetic elements follow Aristotelian rules (i.e: polar opposites should oppose each other)
4. Some Hermetic elements are connected with a certain celestial body by the following relations:
Heat; Tides; Magnetism
5. Contrary to what the scripture says about divine punishment, "Fire" and "Brimstone" are quite far away from each other
6. Gravity plays a role in the alignment of the Hermetic elements
7. People have commonly pointed out how similar the Soul is to Air and Water
8. The Soul is a sinister being
9. Alchemists of the olden days tried transmuting Lead into Gold. However, to do so they first needed to transmute Lead into Copper, then Mercury, then Gold
